Excellent audio-technological features enable fine-tuning the sound-scape of any space, public or private.

Painting and sculpturelike combinations of panels. The appearance of these panels can be changed with the choice of different colours, sizes, and thicknesses giving a three-dimensional effect to the panels.

Almost unlimited choices make it possible to create an individual panel installation for different interior solutions.

Made from pure and safe raw materials. Ecological and suitable for allergic people. No release of harmful emissions in room, fire resistant.

Suspension with wall rails and fittings.
